HEALTH OFFICER  
Nashua Environmental Health

APPROVAL FOR CONSTRUCTION: This document issues approval to schedule construction of the subsurface disposal system as specified on the plans State Approval# CA1999015 Lot#2460, Street# 14 Winn Road, NAS 217

No less than 24 hour prior to commencement of any construction activities the Environmental Health Department must be contacted to schedule the following construction phase inspections:

1. Excavating to, plus exposure and preparation of, the native soil receiving area.
2. Upon completion of placement of all septic sand fill and final preparations of bed bottom prior to placement of chambers or stone.
3. Upon completion of installation of all system components to include pump and alarm system wiring if a pump is required.

Approval for operation will be granted only after the satisfactory completion of the above mentioned inspections and all other details specified on the approved plan.
